JANA ARVIND SURYA

AI APPLICATION ENGINEER & FULL-STACK DEVELOPER

India (Open to Remote & Relocation) | **Email:** arvindjana05@gmail.com | **GitHub:** github.com/Arvind-Jana | **LinkedIn:** linkedin.com/in/arvind-jana

PROFESSIONAL SUMMARY

Detail-oriented **AI Application Engineer & Full-Stack Developer** with hands-on expertise building production-ready generative AI systems, real-time WebSocket backends (Node.js/Socket.io), and multivariate interactive data visualizations. Proven track record winning competitive technical challenges (**Handshake x OpenAI Challenge** and **Google Gemini Mission**, both scoring **5/5**) by transforming complex machine learning models, benchmark datasets, and real-time state machines into high-impact user experiences.

KEY TECHNICAL PILLARS (THE BIG 3)

- **Full-Stack Real-Time AI Systems:** Built *Turing Trap* (Node.js/Socket.io) with authoritative room state, secret AI text generation, 30-sec voting countdowns, and Web Audio. Scored **5/5 across all 4 contest rubric criteria** with <50ms latency.
- **Translating Complex Data into Products:** Engineered the *AI Career Decision Navigator* for Google Gemini; modeled 2,450+ benchmark points across 6 tech domains with dynamic 5-axis Radar charts, proving a **+28.4% AI compensation multiplier** (Score: **5/5**).
- **Rigorous CS Core & High Velocity:** B.Tech in Computer Science & Design; virtual internships in AI/ML (supervised modeling, feature engineering) and Android/SQL ETL pipelines; certified by **IBM** and **Infosys Springboard**.

FEATURED PROJECTS

Turing Trap: Real-Time Multiplayer AI Impostor Game — Sep 2024 — Present

Handshake AI Skills Studio X OpenAI Challenge (Contest Rubric: 20/20 — 100%)

- Architected authoritative WebSocket game engine in Node.js/Socket.io with synchronized room state transitions (<50ms latency).
- Integrated undercover AI response generation to anonymously challenge players to differentiate LLM text from human wit.
- Engineered an autonomous 'Simulated Friend' bot engine enabling solo evaluators to test full deception rounds with 1 click.
- Synthesized procedural Web Audio API sound effects (buzzer, fanfare) with zero external audio file dependencies.

AI Career & Compensation Decision Navigator — 2024

Handshake AI Skills Studio X Google Gemini Mission (Contest Rubric: 20/20 — 100%)

- Synthesized 2,450+ benchmark points across 6 tech domains (Stack Overflow 2024-2025, Levels.fyi, U.S. BLS).
- Formulated econometric trade-off models proving 8–10 weekly hours of AI upskilling yield a +28.4% salary lift for junior developers.
- Engineered single-page HTML5/Tailwind/Chart.js app featuring interactive sliders and responsive 5-axis Radar charts.
- Implemented zero-latency client-side CSV dataset export for offline analytical exploration.

Intelligent B2B Account Scoring & Pipeline — 2024

Clay Data Enrichment & Sales Intelligence Project

- Built qualification scoring algorithms combining company headcount velocity, tech telemetry, and decision-maker roles.
- Automated multi-step enrichment workflows qualifying 25 enterprise accounts with structured executive briefing reports.

PROFESSIONAL EXPERIENCE & INTERNSHIPS

AI & ML Intern — Virtual Internship — Jan 2024 — Mar 2024

- Implemented supervised and unsupervised models (linear regression, decision trees, baseline neural networks) in Python.
- Executed end-to-end data preprocessing, feature engineering, and model evaluation metrics using Pandas and Scikit-Learn.

Android Developer & Data Intern — Virtual Internship — Apr 2024 — Jun 2024

- Executed SQL extraction and transformations to prepare performance datasets for monthly executive reviews.
- Identified data discrepancies and implemented verification queries, streamlining monthly report turnaround times.

TECHNICAL SKILLS

AI & LLMs:	OpenAI API, Google Gemini, Prompt Engineering, RAG Concepts, LLMOps, Scikit-Learn
Full-Stack & Systems:	Node.js, Express.js, Socket.io, JavaScript (ES6+), HTML5/CSS3, Tailwind CSS, Python, Web Audio API
Data & Analytics:	SQL (Queries, Joins, Aggregations), Pandas, NumPy, Data Modeling, Chart.js, MongoDB
Tools & Platforms:	Git, GitHub, Replit Cloud Deployment, Render, Railway, VS Code

EDUCATION & VERIFIED CREDENTIALS

B.Tech in Computer Science and Design (CSD) — Sasi Institute of Technology and Eng. — 2022 — Present

- **Certifications:** IBM (*Getting Started with Data*, *Intro to Data*); Infosys Springboard (*Data Science*, *Express.js*, *MongoDB*, *Java*)
